

Shopster shopping cart series

**Shopster**  
rolling your business

## Shopster shopping cart series

All Shopster trolleys are designed to ensure maximum mobility, shopping efficiency and pleasure to your customers – generating higher revenue to your retail.

These state-of-the-art shopping carts were engineered and developed by focusing not only on your customers' needs but also to meet your expectations – better sales figures.

Our main purpose is to provide the best Quality, combining the highest efficiency on a competitive price level.

### Safety and Quality

Safety is a top priority key element when a product is for end-users. SHOPSTER is highly committed to put extreme efforts into running its business in compliance with the European security standards.

All Shopster trolleys meet the requirements of EN-1929-1 European standards regarding shopping carts' safety.

Quality, as an essential part of our philosophy, equals with long lasting product lifetime and all around the clock availability in your retail area.

In order to satisfy your and your customers' needs at the highest level, all SHOPSTER trolleys are produced of top quality components with the latest technology features such as:

- reinforced tubular frame,
- 8 mm cart frame wire diameter,
- min. 10 µm ZN+ transparent powder coating thickness to meet the exigencies of the ISO 92271's salt spray test,
- 125 mm precision ball bearing castors.
